- Divide one hockey pitch into two for practice sessions
- Protect backboards from continual training shots
- Position outside goals to catch off-target low shots

HOCKEY PITCH DIVIDER PAD

Designed for multi-use purpose on and around the hockey pitch.

The 3.6m pads are sold singly and can be combined together to create the required length

- The pads can be used for hockey training to divide one full size pitch in half for small sided games or used to divide up specific areas as required for practice.
- The pads are also ideal for shooting practice and again have a multi-use. One pad will fit inside the goal backboard to protect from repeated low shots in training and the pads can also be positioned to the outside of each post catching any off-target low shots.
- 16 pads will divide the full width of a hockey pitch. The pads are manufactured from PVC covered Foam with an internal strip of wood to provide stability.
- The pads are long thin sections (3.6m long, 120mm high and 160mm wide) and each pad can be joined to the next via a secure velcro fixing.
- Weight: 4.00 kg each
